# Pain

I see you're unhappy so?  
Perhaps it's another globe?  
Or another sip of  
The God cherished freedom  
In yet one more guy or girl?

I know only that some day  
We can't say to each other - Hey!  
'Cause we live in diverse worlds  
In far parts of the universe  
But today we are both here!  
We can be together clear!  
We can choose the lie or pain  
And we choose the pain again!

And all that you know - a myth?  
And all that you don't - a truth?  
I did not notice  
As the years passed off  
I will not stop fighting for love!

I know only that some day  
We can't say to each other - Hey!  
'Cause we live in diverse worlds  
In far parts of the universe  
But today we are both here!  
We can be together clear!  
We can choose the lie or pain  
And we choose the pain again!

It's like the death  
The death of love  
The love for us  
Like a little dove  
When you forget  
The faith and truth  
You're part of yet  
I utter, whisper  
Shout one word...  
And that is pain!  
The word is pain!

We found one another here,  
But something has disappeared  
And we stopped noticing  
The pain we're each having  
What has been lost is very sad

I know only that some day  
We can't say to each other - Hey!  
'Cause we live in diverse worlds

In far parts of the universe  
But today we are both here!  
We can be together clear!  
We can choose the lie or pain  
And we choose the pain again!

## Body and Soul

God gave you perfect body  
The body of which you should care  
The body that you give somebody  
The body that I need as air

And here you are back at the mirror  
I understand what you prepare  
But I cannot prevent this error  
Because we even do not pair

Wait for your fate!  
Don't do that what turns love to hate  
Stop! Dear! Stay!  
Don't let no one in, we can't pay  
Yes! You are free!  
But maybe then you'll wanna be  
Only one girl and just for me!

You've an immortal soul  
The soul that remembers all  
All that you do behind the keyhole  
All you get like a doomed nightfall

And so I'm left alone to wait here  
As a knight with a wounded heart  
I try to hold on to my spear  
But we are now so far apart

Wait for your fate!  
Don't do that what turns love to hate  
Stop! Dear! Stay!  
Don't let no one in, we can't pay  
Yes! You are free!  
But maybe then you'll wanna be  
Only one girl and just for me!

Wait for your fate!  
Don't do that what turns love to hate  
Stop! Dear! Stay!  
Don't let no one in, we can't pay  
Yes! You are free!  
But maybe then you'll wanna be  
Only one girl and just for me!

# Renewed Light

I'm feeling your winter, it comes again  
I look out the window, hard to explain  
And outside there is darkness, there's killing cold  
Your aren't here no longer. You are gone in that world

Waking up, looking for your smell in my bed  
I get dressed in a hurry, rush to you mad  
But again and again now, by someone's hand  
Blocks my way to the world, to that deadly land

We'll never forget what we left in the past  
We'll never forget those people we trust  
Come back from the dark side, find the way  
Let's make the life from that undying ray

So give me a sign in this endless night  
You are out there. This way is right  
It doesn't matter the danger outside  
We are so close, we will renew the light

Some gunshots are so close and some kind of far  
Someone is trying to get out of this burning car  
Someone's praying for wonders, they see no end  
Someone drinks everything, but we don't, my friend

Look, there comes a new dawn! What is in store?  
But you are afraid that light will be no more  
And I see too few days left in your way  
Wish I could give you more than one good day

We'll never forget what we left in the past  
We'll never forget those people we trust  
Come back from the dark side, find the way  
Let's make the life from that undying ray

So give me a sign in this endless night  
You are out there. This way is right  
It doesn't matter the danger outside  
We are so close, we will renew the light

# Hidden Rage

Your shelter crammed  
Technology  
It's funny that  
You ask me for the key  
Why am I standing here?  
You stay an engineer  
All that remains for me  
It's press  
"Reset" to free

I know that existence  
Does not mean life  
I need your resistance  
I want your desperate strife  
Anything you want  
But the personal cage  
You should go beyond  
And to show hidden rage!

You always hold  
Me at the door,  
You have controlled  
My image to ignore  
I'm gonna leave from here  
You fear to be sincere  
It makes no sense to wait  
For fate  
When you update

I know that existence  
Does not mean life  
I need your resistance  
I want your desperate strife  
Anything you want  
But the personal cage  
You should go beyond  
And to show hidden rage!

All that you do  
Is life alone  
And that I knew  
Your eyes like a cold stone  
I think behind your fear  
All works with auto gear  
And what you have to make  
It's press  
"Reset" to wake

I know that existence  
Does not mean life

I need your resistance  
I want your desperate strife  
Anything you want  
But the personal cage  
You should go beyond  
And to show hidden rage!

# Sunrise

Day after day  
I just work up a sweat  
Time's running out  
But I still live in debt

Dream after dream  
But again I can't see  
Nothing for you  
And nothing for me

When sunlight falls on my window  
I can sleep no more  
When it comes, I feel the wind blow  
Everything starts, behind this door

It's my time, anew  
To make my wish come true  
To light up your wide eyes  
I'll be your new sunrise

Night after night  
We are always alone  
I see in sight  
You chat with someone

Sleep after sleep  
I arise by alarm  
Day's running out  
But time's in my arms

When sunlight falls on my window  
I can sleep no more  
When it comes, I feel the wind blow  
Everything starts, behind this door

It's my time, anew  
To make my wish come true  
To light up your wide eyes  
I'll be your new sunrise

Day after night  
You are waiting for me  
Time is alight  
We should move to break free

Let start anew  
And then you can see  
All things for you  
And all things for me

When sunlight falls on my window  
I can sleep no more  
When it comes, I feel the wind blow

Everything starts, behind this door

It's my time, anew

To make my wish come true

To light up your wide eyes

I'll be your new sunrise

It's my time, anew

To make my wish come true

To light up your wide eyes

I'll be your new sunrise

## Holy Dreams

Then you were there where I couldn't be  
I fought somewhere to be free  
And I believed that I could not cheat thee

And then has come one of those days  
It seems I see your passing trace  
I hear tears fall down in another maze

We did not know, but waited for  
The dream to touch us like before  
Together we would go on taboo path once more

We long through space and through lifetimes  
We drink the tears. We eat the grimes  
It is here that we make all our crimes

Before we were in different worlds  
I fought for you with broken swords  
And you rejected pleasures and rewards

As in those holy dreams we had  
We keep the fight, though we have bled  
We are together when no one else there can get

We did not know, but waited for  
The dream to touch us like before  
Together we would go on taboo path once more

As in those holy dreams we had  
We keep the fight, though we have bled  
We are together when no one else there can get

# Crystal World

Come into the woods at the time of late fall  
When the earliest frost forges leaves together  
Choose a new day when morning's cold  
Makes the air clear with frosty weather

You take a deep breath and you are one soul  
With crystal clear world right in one time  
Where human warmth nobody stole  
As closed lips at a shy kiss of mine

Come into the woods at the time of late fall  
When it all becomes the same as in old days  
Find a forgotten glade long ago  
Where the world took care of us in the place

You take a deep breath and you are one soul  
With crystal clear world right in one time  
Where human warmth nobody stole  
As closed lips at a shy kiss of mine

Now in your soul, as in this world  
In crystal world all is bright  
Now in your soul, as in this world  
In crystal world...

Come into the woods at the time of late fall  
When scents are getting so different, so different  
Stand still in the middle of this crystal world  
Then you will become a part of the movement

You take a deep breath and you are one soul  
With crystal clear world right in one time  
Where human warmth nobody stole  
As closed lips at a shy kiss of mine  
You take a deep breath and you are one soul  
With crystal clear world right in one time  
Where human warmth nobody stole  
As closed lips at a shy kiss of mine

Now in your soul, as in this world  
In crystal world all is bright  
Now in your soul, as in this world  
In crystal world...

# Everything is Wise

Your way  
With someone side by side  
A new adventure every night  
Incredible invite  
Everything is right  
Your move  
Directed through the light  
The gift you have got in the fight  
Incredible great flight  
Everything is right

Can make a test  
Can take a quest  
You have an aim  
You are the best  
Again the same  
Never ending game  
Ends with a surprise  
Everything is wise

You cry  
You run to stay alone  
You see  
It's not so very strong  
Incredible fall down  
Everything is wrong  
Your dream  
To stay awake for long  
Your wish  
Just don't be like a stone  
And every time windblown  
You see again - you grown

Can make a test  
Can take a quest  
You have an aim  
You are the best  
Again the same  
Never ending game  
Ends with a surprise  
Everything is wise

You know  
It's your last chance to shine  
You feel  
It was a secret sign  
Incredible skyline  
Everything is fine

Can make a test

Can take a quest  
You have an aim  
You are the best  
Again the same  
Never ending game  
Ends with a surprise  
Everything is wise

# Sweet Disease

When I look  
When I look at you  
I don't see the wings  
We are not secure  
I just need clear truth  
What do you want to do?  
All things are in your hands  
Nothing to undo

I want to spend my whole life with you  
I want to go with you thousand miles  
I want to do all that you want done  
But I have done it with another one  
I want to be deep into your heart  
Don't wanna leave me falling apart  
But if we want to do that we dream  
We must be set to kill someone gleam

When you touch  
When you are touching me  
Feeling cannot stop  
We're exposed and free  
We are making a sense  
We accept all that is  
And we have got romance  
Full of sweet disease

I want to spend my whole life with you  
I want to go with you thousand miles  
I want to do all that you want done  
But I have done it with another one  
I want to be deep into your heart  
Don't wanna leave me falling apart  
But if we want to do that we dream  
We must be set to kill someone gleam

I want to spend my whole life with you  
I want to go with you thousand miles  
I want to do all that you want done  
But I have done it with another one  
I want to be deep into your heart  
Don't wanna leave me falling apart  
But if we want to do that we dream  
We must be set to kill someone gleam

# Not For Sale

Why am I over again  
Like a madman  
I wanna die in your fane  
You know this is maybe the way  
Indeed I felt  
I own  
What is not for sale

I want that we come  
With a wet sail  
Fat cats will be  
Destined to fail  
And we all can get  
A gift from a high  
Because we won't buy  
What belongs to the sky

Here again you are under sail  
And the wind flies  
In your silken trail  
I know what will happen - you stay  
To find yourself here  
We turn  
Like one piece again

We are getting closer  
Your breath as the breeze  
My heart as the drumbeat  
Let's try be complete

I want that we come  
With a wet sail  
Fat cats will be  
Destined to fail  
And we all can get  
A gift from a high  
Because we won't buy  
What belongs to the sky

# Think

You think  
I've been running  
I've been shunning  
All you hold  
You told  
I am dying  
I'll start crying  
From your cold

Can you see the smile in clear heaven?  
Please be there. Wait for me  
Can you see the stars in upper level?  
Please tell me where, we will be...

You see  
I am changing  
I'm not caging  
I'll get all  
You know  
I'm not an angel  
With evangel  
I will go

If the Gods return to us whatever  
So they will never ask when we do  
Maybe I can't stop the madness lever  
But I can't sever me and you

Can you see the smile in clear heaven?  
Please be there. Wait for me  
Can you see the stars in upper level?  
Please tell me where, we will be...

If the Gods return to us whatever  
So they will never ask when we do  
Maybe I can't stop the madness lever  
But I can't sever me and you

## I'm Your Guide (club mix)

The realm in which I live  
Like big water stream  
It bears me to future  
Where is my dream  
I'm clinging to sprays of trees  
I'm feeling unease  
And suddenly I have seen  
Your glance like a skene

None stop  
And all move in one tide  
Just tug  
I'm your guard, I'm your guide  
Foothold  
Spark should be in your eyes  
The world  
See with me in these times

We both understand  
Flow is stronger my hands  
We all understand  
That we on other strands  
That the realm which we cherished both  
Us carries away  
We have taken the sacred oath  
But I try to stay

None stop  
And all move in one tide  
Just tug  
I'm your guard, I'm your guide  
Foothold  
Spark should be in your eyes  
The world  
See with me in these times
